<tbody>
<tr>
<td></td>
<td>This working group will focus on issues surrounding group-based population management (both in situ and ex situ) for taxa in which data may be collected and/or management actions conducted only on groups of organisms, rather than on specific individuals. We will present a summary of the Group Management Initiative and invite feedback.</td>

Species Planning in a Virtual Environment: Think Tank (Jamie Copsey, Fabiana Lopes-Rocha)
This working group will provide an opportunity for participants to exchange and learn from each other new tips and tools for planning within the virtual environment. The session will begin with an introduction to some of CPSG’s current thoughts and ideas about how we can maintain commitment to the principles that underpin our planning work, virtually. Break out groups will then look critically at some of the guidance being proposed and generate and share their own understanding and experiences. Outputs from the working group will then be used to contribute to the drafting of Applying CPSG Planning Principles and Steps within the Virtual Environment.
